Introduction

My career so far has mainly centred around the education industry, for which I maintain a great deal of passion. I have recently begun studying part-time for a diploma in software development as I feel this is where my logical and creative nature will be a great asset. I am very excited to be learning something new, and despite the obvious challenges, I have enjoyed every second of my studies so far.

Experience

Senior Data Analyst | Learning Plus UK Data Ltd

February 2016 – Present

Line manager in not-for-profit organisation, reporting to the Chief Executive Officer.

Ensuring high quality data collection, collation, analysis and presentation. Assisting with data product and service development. Leading a small team of data analysts. Carrying out duties and responsibilities of Education Data Analyst (below).
